CESUR-III

**INSTANT
RESPONSE
CAPABILITY
FIREFIGHTING
UAV**

Equipped with interchangeable nozzles that can use various extinguishing agents, it can handle all types of fires

Technical Specifications

60M

It can effectively perform firefighting operations at **High Altitudes**.

The High Operating Pressure delivers water and foam over wider areas, enabling quick and effective fire response.

The Adjustable Nozzle allows for optimizing the flow of water or foam according to different fire conditions.

573K

Heat Resistance provides excellent durability against high temperatures, ensuring the drone operates safely in harsh fire conditions.

Thermal Camera

Provides clear images in low-light and challenging conditions.

Remote Control

Offers precise and secure control on a large screen.

Straight Water Lance

Water is directly delivered to the target.

Heavy Foam Lance

By forming a dense foam layer, fires are quickly brought under control.
